WRI Overview

World Resources Institute (WRI) is an independent, nonprofit global research organization that turns big ideas into action at the nexus of environment, economic opportunity and human well-being. We are working to address critical challenges that the world must overcome this decade in order to secure a sustainable future for people and the planet: climate change, energy, food, forests, water, sustainable cities, and the ocean.

Internships at WRI are learning experiences designed for current students, recent graduates, or other candidates who wish to gain knowledge about a specific area of our work. We strive to attract diverse, intellectually-driven candidates who have a passion for sustainability and development. WRI provides many internship opportunities throughout the year in all our programs.

WRI is committed to advancing gender and social equity for human well-being in our mission and applies this principle to our organizational and programmatic practices.

WRI Ross Center Overview

WRI Ross Center for Sustainable Cities works to make urban sustainability a reality. Global research and local experience in Brazil, China, India, Mexico, Turkey and the United States combine to spur action that improves life for millions of people. Aiming to influence 200 cities with unique research and tools, WRI Sustainable Cities focuses on a deep cross-sector approach in four megacities on two continents, and targeted assistance to 30 more urban areas, bringing economic, environmental and social benefits to people in cities around the globe.
Internship Summary

The internship offers learning opportunities in international development around urban mobility, particularly in public transport and delivery of Sustainable Development Goal 11 targets to provide quality public transport to all urban residents and meet global climate commitments to reduce or prevent growth in urban transport emissions, in addition to other social and environmental goals. The intern will take on a key research project of the program to provide strategic guidance on public transport policies, particularly in developing countries, that grow and retain high mode share/ridership of public transport and integrated transport including walking and bicycling. The intern will learn to conduct policy analysis on the national and city level around issues surrounding sustainable transport. This includes tentatively work on three specific areas: 1) research support on contemporary issues in public transport policies to support global goals; 2) research on enhancement of country commitments on transport from the Paris climate accord; and 3) policies/city-level strategies to support sustainable urban freight. The internship offers the opportunity to connect with sustainable transport experts and key stakeholders from around the world.

Learning Outcomes

The intern will gain experience in the following areas:

- Sustainable transport policies and practices, particularly in developing countries
- Global commitments and policies on sustainable transport, including climate change, health, and the Sustainable Development Goals.
- Conducting research, literature reviews and synthesizing findings for a global research organization;
- Contributing written and graphic content to publications, reports, papers, and presentations.
- Experience with a global network of staff working on sustainable transport.

Internship Qualifications

- You must be a current student at your school;
- Candidates may be pursuing degrees in public policy, international development, urban or transport planning, engineering, environmental/sustainability studies or similar.

General Internship Requirements

- Applicants must have personal health insurance coverage.
- U.S. work authorization is required for this opportunity. WRI does not sponsor interns for visas.

Compensation: University Sponsored: This position is dependent on the student receiving compensation or academic credit from their university program. WRI does not offer compensation for this internship.

Duration: This is a full-time, 12 week summer internship with start date options of May 16, June 3, or June 17, 2019, based on the student’s availability and need for the project.
How to Apply

Applicants must apply through the WRI Careers portal to be considered.

The World Resources Institute (http://www.wri.org) is an environmental and development research and policy organization that creates solutions to protect the Earth and improve people’s lives. As an Equal Opportunity Employer, it is WRI’s policy to recruit, hire, and provide opportunities for advancement in all job classifications without regard to race, color, religion, sex, national origin, age, citizenship, marital status, sexual orientation, gender identity, parental status, protected veteran status, or disability. WRI’s global agenda requires a staff that is diverse – with respect to race, gender, cultural, and international background. Diverse perspectives and experience enhance the way WRI selects and approaches issues, as well as the creativity and applicability of WRI’s policy research and analysis. WRI, therefore, encourages applications from U.S. minorities, persons from other countries (especially developing nations), and from women of all backgrounds.
